

## Job Opening: Software Engineer

Charlotte, NC; Plano, TX; San Francisco, CA

We are seeking smart, energetic and motivated Software Engineers to help us (BofA) continue to deliver our top-rated, J. D. Power-certified mobile app used by over 41M+ users. So, if you are a Computer Science/Related major graduating in this Spring / Summer 2022, passionate about mobile banking/fintech, get ready to work in a most supportive environment rated among the Top Companies to Work For. You will be part of a rare team that truly looks out for you to help you succeed. We have positions open in San Francisco, Plano and Charlotte locations, on a rolling basis.

### Job Description

A Software Engineer (SE) will be responsible for design, development and coordination of code development activities on BofA Mobile Applications (iOS and Android). Primarily responsible for delivering design and code while assigned to a project, a SE will represent the development team to the other support groups such as UX development, business sponsors, functional testing, technical/stress testing, and environment-support (such as production and certification). Some of the other responsibilities include:

- Software development activities such as high-level design, low-level design, code, unit test cases, code maintenance, troubleshooting, and code documentation on application development/enhancements/initiatives.
- Code merges, builds, deployments, and setting up of the deployment environments.
- Functional/technical testing on deployment package, troubleshooting issues during testing, and delegating them to the appropriate project teams.
- Coordinating with other developers and QA personnel to manage/address/resolve bug reports.
- Communicating to the management regarding the status of the release.
- Participating in the design, security, capacity and ADA compliance reviews.
- Tasking and allocating resources on the assigned projects, and
- Related tasks.

The ideal candidate will have the following:

- B. S. or an M.S. in Computer Science/Related from an accredited program
- 1+ year(s) of software design/development experience from school or industry (via internships)
- Hands-on experience and expertise in Java, C or C++ (at least one), Swift/Kotlin – most welcome
- Experience and expertise in Mobile technology and related tools is desirable
- Knowledge of advanced software engineering concepts (design patterns, SDLC, OOP, UML modeling)
- Familiar with Agile methodology

- (Desirable but not required to have) Applications in the App/Play store (iOS/Android)
- (Desirable but not required to have) A portfolio of personal mobile dev projects
- A self-starter, who is motivated, innovative and capable of learning quickly
- Hardworking team player with great communication skills able to work with technical and non-technical individuals

We will provide:

- An excellent and supportive work environment with friendly peers (BoFA is among the “Top Companies to Work For” (Fortune, LinkedIn))
- Freedom to exercise creativity and innovation
- Competitive salary with benefits (medical, PTO, 401K, Family Leave, and more)
- Latest hardware, tools and technologies

For immediate consideration, please send your résumé to [cd.vijay@bofa.com](mailto:cd.vijay@bofa.com) (with a link to your public projects on github, elsewhere., if you have one) listing your favorite projects, overall GPA and other interests, if any. Please, NO PHONE CALLS.
