## What You'll Do

- **Hone your strategic abilities and develop in-depth understanding of the pharma, biotech, and med tech industries**
- **In a typical project:**
  - Work closely with team members to solve complex problems by applying a hypothesis-driven methodology
  - Conduct interviews and research to drive to critical insights
  - Create and utilize analytical tools such as forecast models
  - Communicate recommendations to clients to inform strategic decision-making

## How You'll Grow

- **Transition into consulting and rapidly cultivate your skills through our best-in-class training and mentorship:**
  - Two-week training for new consultants that includes an abbreviated project experience
  - Personalized feedback sessions with managers and leadership following each project
  - Individual mentorship from a member of leadership who tracks your long-term professional development
  - Ongoing training to ensure continued success

## Where You'll Go

- **Advance rapidly within ClearView's meritocracy:**
  - Promotions based on individual development, without a rigid timeline
- **Launch a subsequent career in:**
  - Business development, new product planning, or marketing at mid-size or large pharmaceutical companies
  - Commercial, strategic, or portfolio management at life sciences start-ups or biotech firms
  - Venture capital or private equity in the life sciences
